

SAGAR LALWANI

SOFTWARE ENGINEER | BACKEND · CLOUD · AI · FULL-STACK

Hyderabad, India | Open to Remote & Relocation | [Email](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EXPERIENCE

COGNIZANT TECHNOLOGY SOLUTIONS | *Software Engineer (Associate)* | Dec 2023 – Present | Hyderabad, India

- Develop and maintain enterprise applications using C#.NET, SQL Server and REST APIs across development, debugging, testing and production support.
- Automated a manual engineering workflow that previously required approximately 1–2 weeks of effort, reducing execution time to approximately 10 hours.
- Optimized a data-processing workflow involving approximately 40,000 records/day, reducing the volume requiring downstream processing to fewer than 10,000 records/day.
- Build and maintain automation workflows through ServiceNow alongside the C# project, reducing repetitive operational work and improving engineering workflows.
- Investigated and resolved a production email failure that had remained unresolved for more than six months, identifying the underlying issue and implementing the fix.
- Contribute to cloud migration/application modernization and GenAI/chatbot integrations, including interactive response experiences and Adaptive Cards.

FREELANCE SOFTWARE ENGINEER | 2021 – Present | Hyderabad, India

- Designed, developed and deployed production web and mobile applications, working across requirements, backend services, APIs, databases, cloud services and release support.
- Built applications with React, Next.js, React Native, Flutter, Node.js, Firebase and Supabase; implemented authentication, Cloud Functions, webhooks and third-party integrations.
- Published and maintained Android applications through Google Play Console and worked directly with clients and small teams to ship software from requirements through deployment.

SHOPPERR.AI | *Software Engineer — Backend, Mobile & AI* | Nov 2022 – Nov 2023 | Remote

- Contributed as an early engineering team member across Flutter, Firebase, Node.js and machine-learning technologies.
- Developed mobile features, backend workflows and APIs; worked with TensorFlow/Keras during product development and experimentation.

LTIMINDTREE | *Cloud Computing Intern* | Mar 2023 – May 2023 | India

- Worked with AWS and Terraform, gaining hands-on experience with cloud infrastructure and infrastructure-as-code.

SELECTED FREELANCE & PRODUCT PROJECTS

PRP | *Vehicle QR & Communication Platform* | 2026 | Hyderabad, India

- Built a production Flutter/Firebase platform with QR scanning, authentication, claims, checkout and sticker workflows; developed Cloud Functions and integrated Exotel and Razorpay via APIs/webhooks.

CHAIRPE | *Salon POS Platform* | 2026 | Hyderabad, India

- Contributed to a production React/React Native/Supabase salon billing and POS platform used by multiple salons, collaborating with a small engineering team.

DAILY SALES | *Retail POS App* | 2021 | Hyderabad, India

- Developed and deployed a React Native/Firebase Android application with authentication and group-based workflows, publishing the application through Google Play Console.

TECHNICAL SKILLS

Languages: C#, Python, TypeScript, JavaScript, SQL, Dart

Backend: .NET, FastAPI, Node.js, REST APIs, Firebase Cloud Functions

Cloud & Infrastructure: AWS, GCP, Firebase, Terraform, Docker, Linux

Databases: SQL Server, PostgreSQL, Firestore, Supabase

Frontend & Mobile: React, Next.js, React Native, Flutter

AI/ML: Generative AI, Chatbot Development, TensorFlow, Keras

Engineering Practices: SDLC, Agile/Scrum, CI/CD, Testing & Debugging, Version Control, Production Support, Automation

EDUCATION

MAHATMA GANDHI INSTITUTE OF TECHNOLOGY | B.Tech, Electronics & Communication Engineering | 2023 | CGPA: 7.3/10
